## EXPERIENCE

### Gpsdozor.cz — Prague

Senior Front End Developer — 05/2024 - Present

- Developed and maintained production web app in **Vue 2 and Vue 3**: live-updating UI, complex business workflows, and performance work in a long-lived codebase.
- Started development of a **greenfield Vue 3 PWA as the first developer on the project**, defining the initial architecture and building its core functionality, with **Capacitor integration for Android/iOS**.
- Contributing to the **migration of a legacy Vue 2 application to Vue 3**, refactoring and modernizing the existing codebase with AI-assisted development tools.

### Komerční banka — Prague

JavaScript Developer — 08/2020 - 05/2024

- Developed **business process logic in JavaScript** using the **IBM BPM platform** for internal banking applications.
- Built and maintained **automated document processing workflows**, reducing repetitive manual work for the operations team.
- Worked on **data exchange between internal banking systems**, including integrations and processing of sensitive financial data.

### Topite.cz — Prague

Front End Developer — 11/2019 - 08/2020

- Developed a web platform using **Vue.js, Nuxt.js, Vuetify, and Vuex** as part of a small cross-functional team
- Contributed to **frontend development, UX, and product decisions**, working closely with the team on the evolution of the platform
- The company was later **acquired by Woltair**

## SIDE PROJECTS

### Globus digital leaflets — 2026

Built an interactive **Vue.js** web application for **Globus**, transforming static promotional leaflets into dynamic, clickable product catalogs.
More on https://www.globus.cz/globus/letaky/aktualni

### IntellMaps.com — 2025

Built a Vue 3 + TypeScript application for visualizing and navigating interactive 3D building scans and architectural data.
